Sunny	Sunny	Sunny intervals	Light rain showers	Heavy rain showers	Thundery showers
Precipitation probability					
00%	00%	10%	30%	50%	50%

Forecast for Wednesday 02 Jun 2021

Weather: A dry and fine morning, however cloud will increase from the south and west from early afternoon with an increasing threat of showers moving slowly north and east across Snowdonia during the afternoon and into the evening, these could be locally heavy with thunder.

Chance of cloud free mountain/hill tops above 800m: 100% reducing to 70% from early afternoon.

Visibility: Very good with excellent air clarity, however cloud will increase from early afternoon but bases should stay above the summits, however developing showers are likely to result in the sudden deterioration of visibilities later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels are likely to be high during sunny spells, so sun protection is recommended if you plan to spend much of the day in the mountains. Showers from late morning with the risk of thunder are likely to make walking conditions challenging at times.

Forecast for Thursday 03 Jun 2021

Weather: A cloudy start to the day, however cloud should gradually thin and break up a little during the course of the late morning. Sunny spells during the afternoon, perhaps with an odd isolated shower. Cooler than recent days.

Maximum wind: Southwesterly 15-20 mph, gusting 25 mph near summits and ridges.

Chance of cloud free mountain/hill tops above 800m: 40% increasing to 70% from late morning.

Visibility: Generally moderate visibilities during the morning but with cloud bases near 400 to 500m, visibilities are likely to be poor near summits. With cloud bases lifting later in the day, visibilities should markedly improve, becoming generally good if not very good by the evening.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 15 Celsius.
At 800m: Plus 6 Celsius rising to plus 13 Celsius.
Freezing level: Above summits.
